Warranty information

COVERING THE PHYSICAL MEDIA AND PRINTED MATERIALS: ROUTE 66 warrants to you, the original licensee, that the media on which the Software is recorded are free from defects in materials and workmanship under normal use and service FOR A PERIOD OF NINETY (90) DAYS FROM THE DATE OF PURCHASE as evidenced by a copy of the receipt. ROUTE 66's entire liability and your exclusive remedy as to defective media or Related Material(s) shall be, at ROUTE 66's option, either return of the purchase price or replacement of the media or Related Material(s). Each defective item, along with proof of purchase and date, must be sent in a traceable manner, to: ROUTE 66 Geographic Information Systems B.V., Kerkewijk 69, 3901 EC Veenendaal, The Netherlands.

DISCLAIMER REGARDING THE SOFTWARE AND DATA: THE SOFTWARE AND DATA ARE PROVIDED 'AS IS'. ROUTE 66 DOES NOT WARRANT, GUARANTEE OR MAKE ANY REPRESENTATIONS REGARDING THE USE, OR RESULTS OF USE, OF THE SOFTWARE, DATA OR RELATED MATERIALS IN TERMS OF CORRECTNESS, ACCURACY, RELIABILITY, CURRENTNESS OR OTHERWISE. THE ENTIRE RISK AS TO PERFORMANCE AND RESULTS OF THE SOFTWARE IS ASSUMED BY YOU. NEITHER ROUTE 66 NOR ANYONE ELSE WHO HAS BEEN INVOLVED IN THE CREATION, PRODUCTION OR DELIVERY OF THIS PRODUCT SHALL BE LIABLE FOR ANY DIRECT, INDIRECT, CONSEQUENTIAL OR INCIDENTAL DAMAGES (INCLUDING DAMAGES FOR LOSS OF BUSINESS PROFITS, BUSINESS INTERRUPTION, LOSS OF BUSINESS INFORMATION AND THE LIKE) ARISING OUT OF THE USE, MISUSE, OR INABILITY TO USE THE LICENSED SOFTWARE AND DATA EVEN IF ROUTE 66 HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. IF THE DISCLAIMER OF WARRANTY OR LIMITATION OF LIABILITY SET FØRTH IN THIS AGREEMENT SHALL FOR ANY REASON WHATSOEVER BE HELD UNENFORCEABLE OR INAPPLICABLE, YOU AGREE THAT ROUTE 66'S LIABILITY SHALL NOT EXCEED THE LICENSE FEES PAID BY YOU WITH RESPECT TO THE SOFTWARE AND DATA UNIT(S) AT ISSUE.

ACKNOWLEDGEMENT: You acknowledge that you have read this LIMITED WARRANTY, understand it, and agree to be bound by its terms and conditions. You also agree that: (1) No oral or written information or advice given by ROUTE 66, its dealers, distributors, agents or employees shall in any way increase the scope of this warranty, and you may not rely on any such information or advice. (2) This Limited Warranty is the complete and exclusive statement of agreement and supersedes all proposals or prior agreements, oral or written, and any other communications you may have had prior to purchasing.

1 About ROUTE 66

1.1 What is ROUTE 66?

ROUTE 66 is a route planner. The application enables you to find the shortest, fastest or least expensive route from A to B. You can indicate whether you will be travelling by bicycle or car. The application makes it possible for you to calculate travel expenses down to the smallest detail, and to estimate in advance the time involved in travel.

Moreover, ROUTE 66 enables the commercial user to enter dealer channels or branch offices, and to calculate the optimal route from any spot on the map to the closest branch.

1.2 Hardware and software compatibility

ROUTE 66 works on all Macintosh models starting from the Macintosh Plus, with Macintosh system software 7.0 or later. ROUTE 66 needs at least 2 MB of RAM.

- *System software compatibility:* ROUTE 66 is compatible with system software 7.0 or later including system 7.5. (You can determine which version you are using by selecting the System file in your System Folder and choosing 'Info' from the File menu.) If your version is not 7.0 or later, contact your Apple dealer for an upgrade. ❖

1.3 Balloon Help

ROUTE 66 includes Balloon Help. However, Balloon Help is only available if your system software is version 7.0 or later. Balloon Help is activated by choosing the Show Balloons command from the Help menu.

1.4 ROUTE 66 Guide

ROUTE 66 Guide is activated by choosing the ROUTE 66 Guide command from the Help menu. The Guide can also be launched by typing ⌘-?. *For more information: See "The Help Menu" on page 36...*

1.5 Apple Events

Apple Events can be used with system software 7.0 or later. The required AppleEvents and a subset of the core AppleEvents are supported. For use of additional AppleEvents, we refer to the separate manual that came with your software. For more information, see the 'AppleScript ROUTE 66 Guide'.

1.6 TrueType

ROUTE 66 supports TrueType fonts.

1.7 Power Macintosh

ROUTE 66 is optimized to make use of Power Macintosh performance. When you install on Power Macintosh computers, the installer will automatically install an optimized version of ROUTE 66 on the harddisk.

1.8 ROUTE 66 Components

ROUTE 66 consists of four components:

Application: you use the application to open a map and to determine a route on the map. The application also enables you to connect addresses to locations and to answer questions on the basis of these connected locations, such as: "Which business location is closest to a given point on the map?".

Data file (map): a variety of maps are available. The map of the United States is included with the U.S. version. Maps are also available for the European and Eastern European countries. Contact your ROUTE 66 dealer for additional information.

Preferences file: various preferences are stored in this file, such as the position of the windows on the screen as last used, and the colors of the roads. The Preferences file is stored in the Preferences folder in the System Folder.

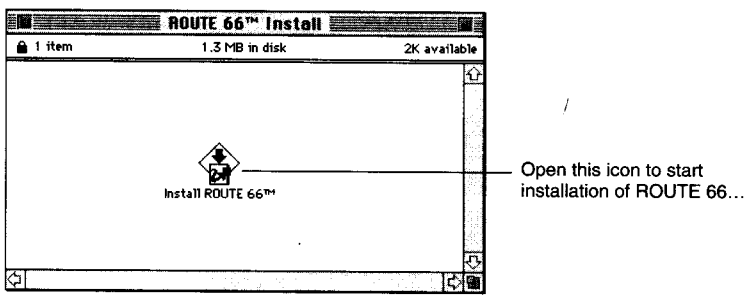
Addresses file: the address data for the various locations you enter are stored in this file. It can be opened in the application together with a data file (map).

2 Installation

Start by unpacking the various components, reading the license agreement on the envelope and going through the steps as explained in this chapter.

2.1 Installing the software

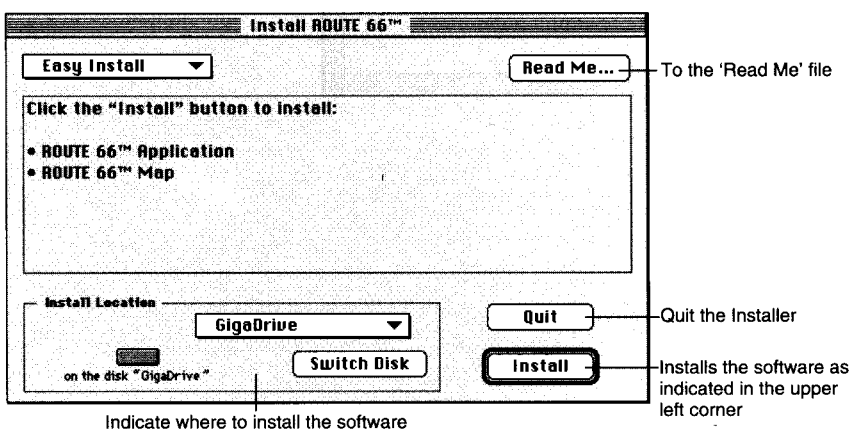
- Insert the first disk of the original set into the disk drive. The following window will appear.



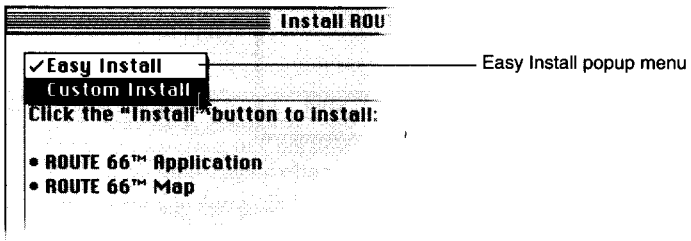
- Open 'Install ROUTE 66™'.

  First the welcome screen appears. Click 'Continue...' and the Read Me window will appear. The Read Me window shows product information, which may be printed or saved from this window. Click 'Continue' to enter the Easy Install window.

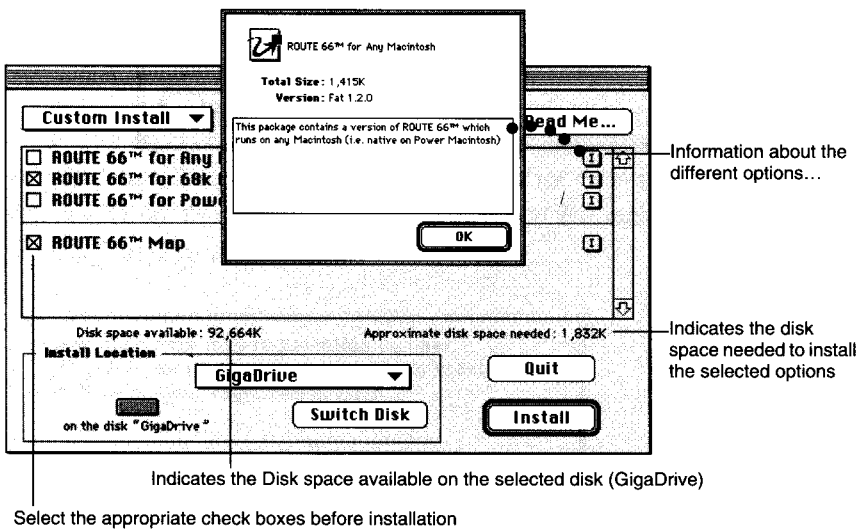
  The Easy Install window allows you to install the appropriate version of ROUTE 66 on your hard disk (see the figure below).



To Install only the map or the application select 'Custom Install' in the popup menu in the upper left corner. If you wish to use 'Easy Install' again reselect it in this popup menu and the window will reappear.

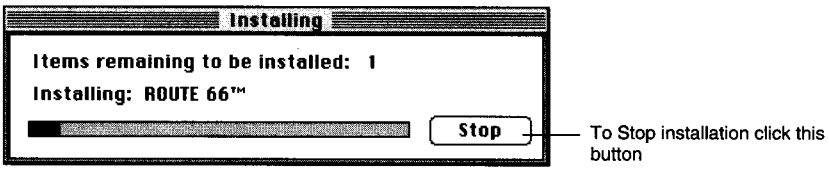


The Custom Install window appears...

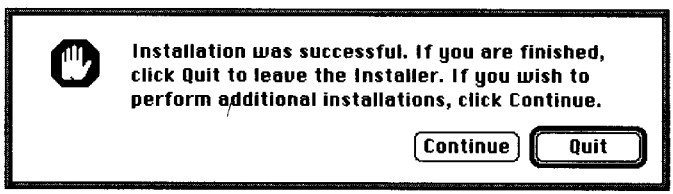


ROUTE 66™ for Any Macintosh
Total Size: 1,415K
Version: Fat 1.2.0
This package contains a version of ROUTE 66™ which runs on any Macintosh (i.e. native on Power Macintosh)
OK
Custom Install
Read Me...
ROUTE 66™ for Any
ROUTE 66™ for 68k
ROUTE 66™ for Pow
ROUTE 66™ Map
Information about the different options...
Disk space available: 92,664K
Approximate disk space needed: 1,832K
Indicates the disk space needed to install the selected options
Install Location
GigaDrive
Quit
Switch Disk
Install
on the disk "GigaDrive"
Indicates the Disk space available on the selected disk (GigaDrive)
Select the appropriate check boxes before installation

When you click the 'Install' button a dialog will appear with a thermometer indicating where you are in the installation process.



After you completed Installation the following dialog will ask you to do additional installations or quit to the Finder.

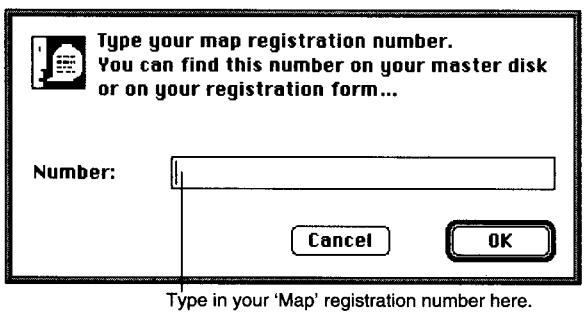


Installation was successful. If you are finished, click Quit to leave the Installer. If you wish to perform additional installations, click Continue.
Continue
Quit

- Open the 'ROUTE 66™' application in the 'ROUTE 66™' Folder.

  A registration window appears. Enter your data and your registration number into this window. You will find your registration number on your master disk(s) or on the registration card. Be sure to type **exactly** the same number including upper-case characters!

When finished, click OK, and do the same for the map that came with your package. You will need to type in a serial number for every map that you use with ROUTE 66. You will only need to do this once. *For more information: See "Starting" on page 15...*



Type your map registration number.
You can find this number on your master disk or on your registration form...
Number:
Cancel
OK
Type in your 'Map' registration number here.

The application can now be used.

❖ *Copying to another Macintosh computer*: ROUTE 66 cannot be copied to another computer via a network or by using a disk. Each time you wish to install the application make sure you use the original disks. Be sure to read the license agreement on the envelope! ❖

- **Fill in your name and address on the registration card, tear it off and simply put it in the mailbox (No stamp is required)**

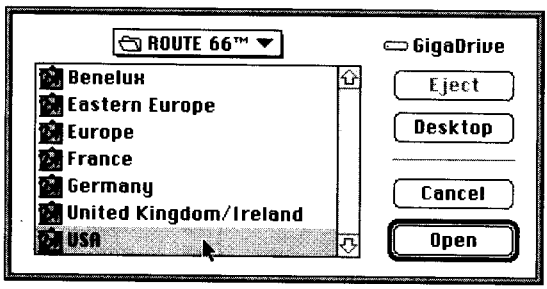
  If you send in the registration form, we will keep you informed of new map files and updates and of all new features that are added to the application. Keep the smaller part of the form with your administrative records. Together with a confirmation of receipt of your registration card, we will send you a small present for taking the time to completely fill in the card!

3 Using the application

This chapter describes the menus and commands of ROUTE 66. For the purposes of this manual, it is assumed that you are familiar with the basic skills needed for using a Macintosh.

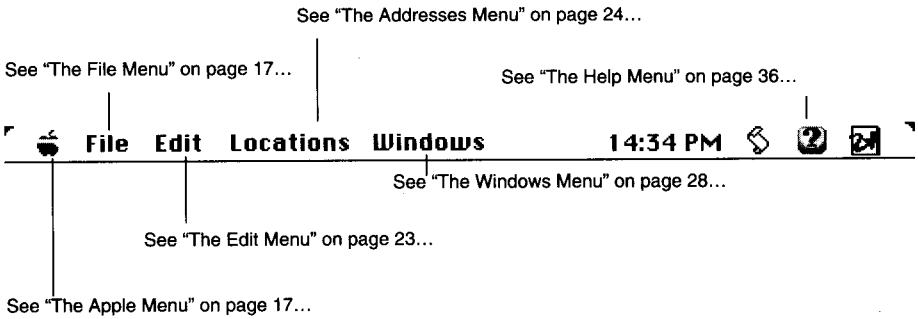
3.1 Starting

When you open the application, the Open dialog box appears, in which you select the map you want to use. Select the appropriate map and click Open.



3.2 The menus

ROUTE 66 has four menus, which are explained below.

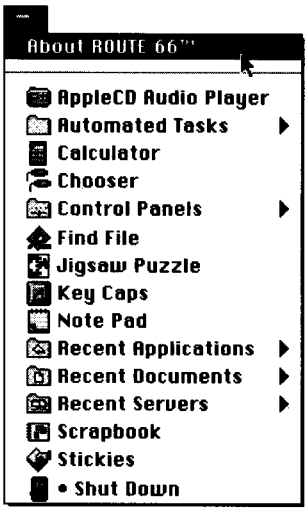


See "The Addresses Menu" on page 24...
See "The File Menu" on page 17...
See "The Help Menu" on page 36...
File
Edit
Locations
Windows
14:34 PM
See "The Windows Menu" on page 28...
See "The Edit Menu" on page 23...
See "The Apple Menu" on page 17...

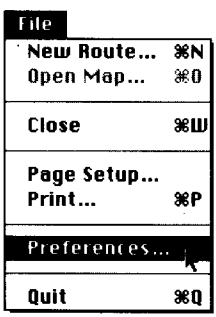
In addition to these ROUTE 66 menu's we will also discuss ROUTE 66-specific items in the Apple menu, and the Help menu.

3.2.1 The Apple Menu

You use the first command in the Apple menu to open the About ROUTE 66 window. This window contains information about the application, and copyright notices of the application and maps.



3.2.2 The File Menu



The File menu offers all standard menu items, and some ROUTE 66-specific commands: New Route and Preferences. In this section these commands will be discussed.

3.2.2.1 New Route (⌘-N)

A new route can be selected by choosing the New Route command. After you choose this command the New Route dialog box appears.

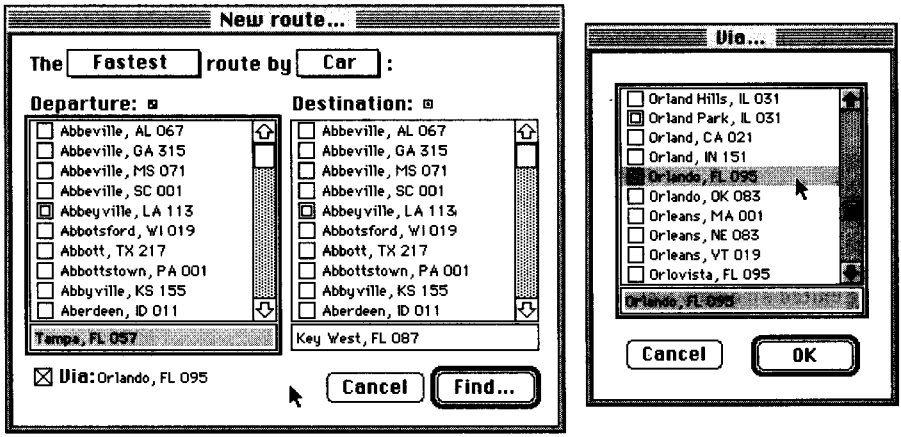
The points of departure and destination can be entered using this dialog box. Scroll the list until the desired location appears, or click the list and type the name or the first letters of the location you are looking for. The list then automatically scrolls to the location you entered.

A variety of types of locations are included in the list. Each type of location has its own icon. To search again, clear the entry field under the list and type the name of the new location. The same search method is used in all lists.

The following location types are used in the maps:

- Border Crossing
- Junction
- Intersection
- Exchange
- Ferry service
- Capital city
- more than 500,000 inhabitants
- 250,000 - 500,000 inhabitants
- 100,000 - 250,000 inhabitants
- 50,000 - 100,000 inhabitants
- 25,000 - 50,000 inhabitants
- Village
- Hamlet

You can also use the New Route dialog box to indicate whether you want the shortest, fastest or least expensive route and whether you are travelling by bicycle or car.

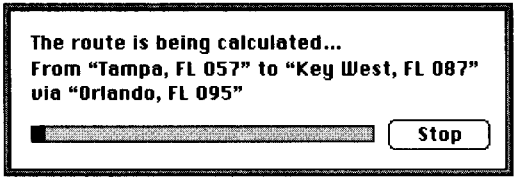


Using the Via checkbox (or ⌘-space bar), you can open a dialog box in which a location to be included on the route can be selected (see the figure above). The Via option is disabled by clicking the checkbox again.

Once you have selected the desired locations, click the Find button to initiate calculation of the selected route.

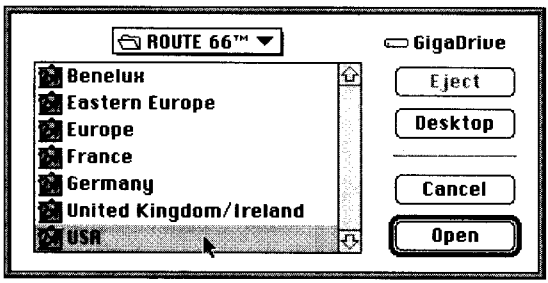
- The route is calculated using a number of parameters, such as the speed at which you can travel on the various types of roads. These settings can be changed in the Preferences dialog box, that can be opened by choosing the Preferences command from the File menu. ❖

To indicate how long the application will need to calculate the chosen route, a calculation box appears with a status bar.



3.2.2.2 Open Map... (⌘-O)

When you choose this command, a dialog box appears in which you can open a map. Only one map can be opened at a time.



3.2.2.3 Close (⌘-W)

Use this command to close the window in the foreground. The Close command is not available when no map or company window is opened.

3.2.2.4 Page setup...

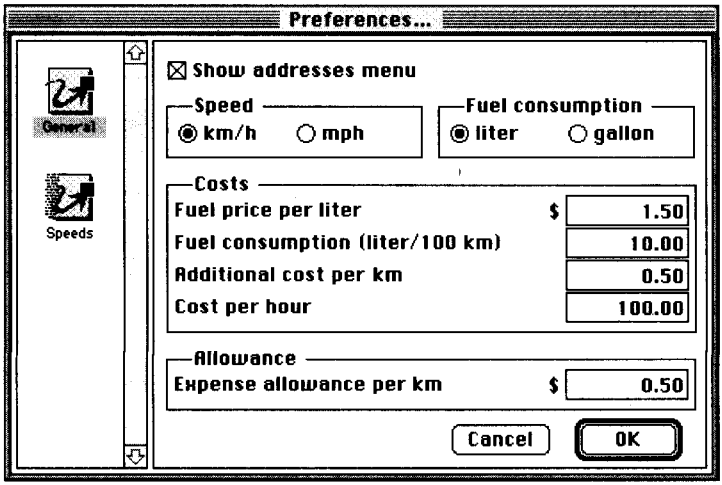
Use this command to select the page setup for printing. A dialog box appears in which you can select the appropriate settings for your printer.

3.2.2.5 Print (⌘-P)

Use this command to print the map or the itinerary. If you want to fax the itinerary to your customers, you can copy both the map and the itinerary and paste them into a document you have made with a word processing or other application, or use this command in combination with fax software.

3.2.2.6 Preferences

When you choose this command, a dialog box appears in which you can select preferences for the application.

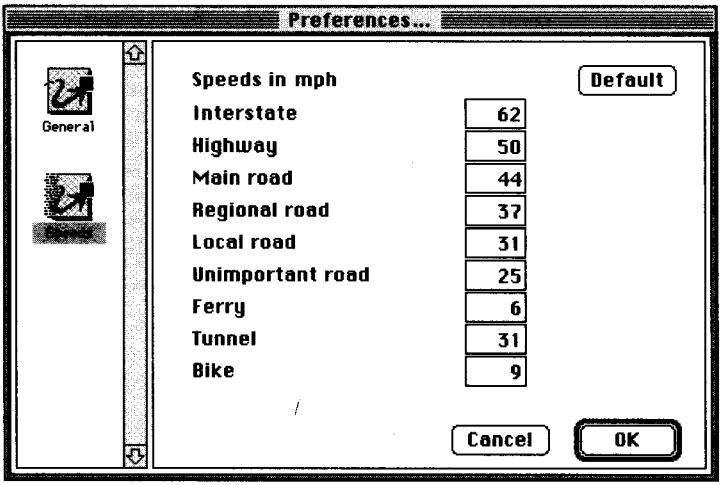


If you change the preferences after a route has been selected and calculated, the distance and fuel consumption are recalculated. If you change the units of measurement, the settings in the Speeds and Costs panels are recalculated based on the chosen units.

❖ Note: To change the currency used by ROUTE 66 open the Numbers control panel and change the currency. You will need to restart the application to use the new currency. ❖

The following parameters can be set in the Preferences dialog box: whether or not to sho the Locations menu (see page 22), the speed unit, the unit of fuel consumption, the fuel price, the fuel consumption, the additional cost (besides the fuel cost) per length unit, the cost per hour and the expense allowance per length unit.

You can change your average speed in the Speeds panel of the Preferences dialog box. The default values can be restored by clicking the Default button in the upper right of the window. The units for distance (kilometers or miles) can be changed in the General panel of the Preferences dialog box.



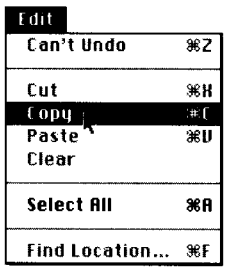
❖ Note: If you specify travel by bike, the bike speed is used on all road types (unless for a specific road type, the speed is lower than the bike speed). In addition, the 'Interstate' and 'Highway' roads are avoided when travelling by bike.❖

3.2.2.7 Stop (⌘-Q)

Use this command to quit the application. If you have made changes to a companies file and have not yet saved them, you are asked whether you want to save your changes before quitting the application.

3.2.3 The Edit Menu

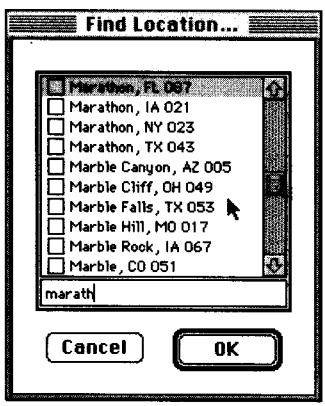
You can undo your last action, or copy, cut and paste sections of the text or map using the commands in the Edit menu.



With the Select All command you can select all text in an entry field or the entire map. If the itinerary is the top window, the entire itinerary is selected.

3.2.3.1 Find... (⌘-F)

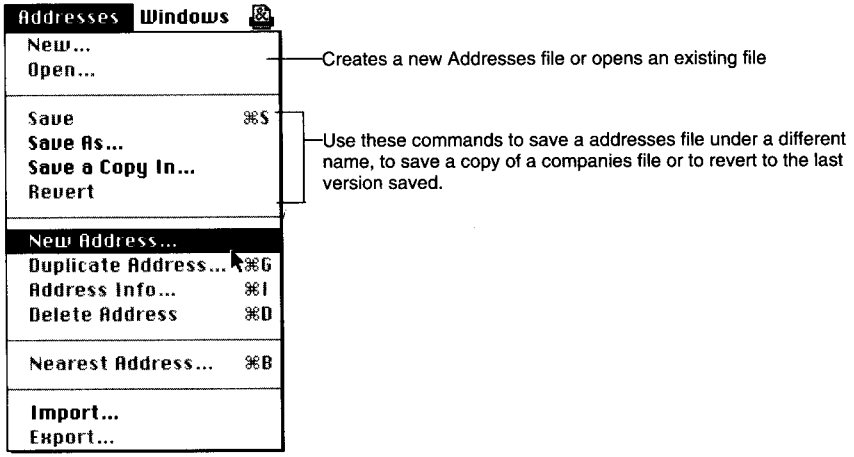
When you choose this command, a dialog box appears with all available locations. After selecting a location and clicking OK, a map appears that is zoomed in on the location you have selected. This gives you a general view of the map in and around the selected location.



3.2.4 The Addresses Menu

The Addresses menu is of particular importance to the commercial user. The commands in this menu can be used to connect various branch offices or dealers to points in the map. The addresses file is a separate file. A number of different addresses files can be created. However, only one addresses file can be opened at any given time.

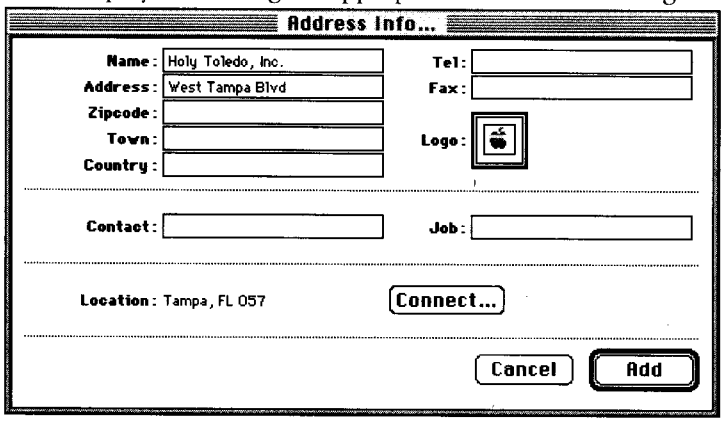
When you create a new addresses file or open an existing file, the addresslist appears. This is a list of all the addresses that have been entered and/or imported.



3.2.4.1 New Address...

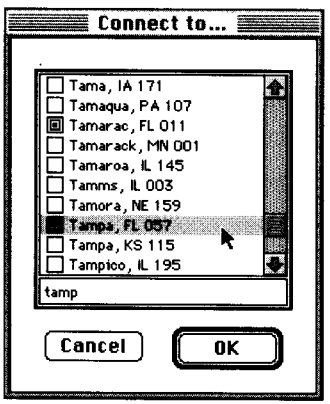
When you choose this command, the Address Info dialog box appears. In this dialog box, you can enter information about the address plus one contact name.

You can also include a logo by selecting the field with the logo, and paste in a logo from the clipboard. This logo is then shown on the map. You can turn off the logo's in the map by deselecting the appropriate checkbox in the legend.



An address can be connected to a location on the map by clicking the Connect button.

After you click the Connect button, the Connect To dialog box appears. Select the location to which you want to connect the location in this dialog box and click OK. The dialog box closes and the location is included in the Info window for the relevant address.



3.2.4.2 Duplicate Address... (⌘-G)

This command becomes active when an address is selected in the Address list. Choose this command to duplicate the selected location.

3.2.4.3 Address Info (⌘-I)

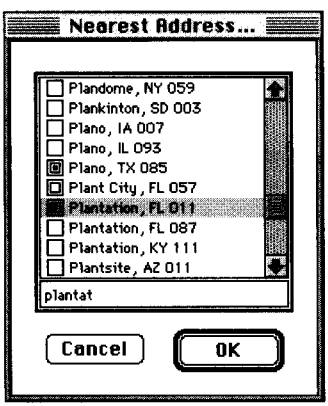
This command becomes active when an address is selected in the Addresses list. Choose this command to open a window with information about the selected location.

3.2.4.4 Delete Address (⌘-D)

This command becomes active when an address is selected in the addresses list. Choose this command to delete the selected address.

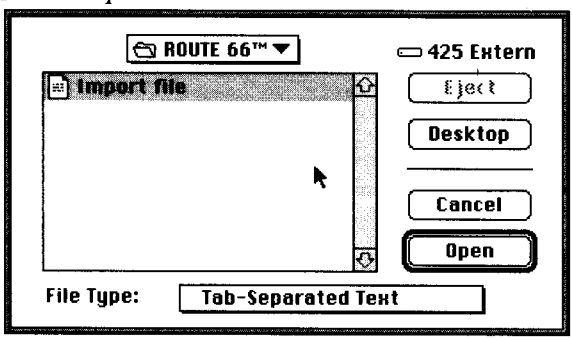
3.2.4.5 Nearest Address ...

You use this command to find the address located closest to a given point on the map. When you choose this command, the dialog box below appears. Enter the location from which the location must be sought and click OK.

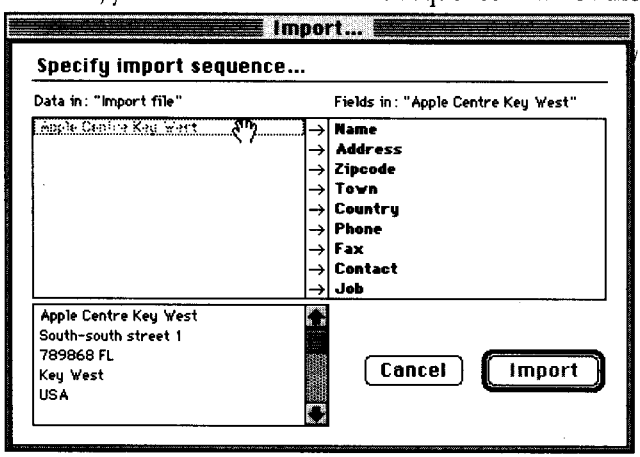


A calculation will be carried out to find the nearest address in the map. As a result the Address nearest to the specified departure will be shown in the map and a route will be plotted to that location.

3.2.4.6 Import...

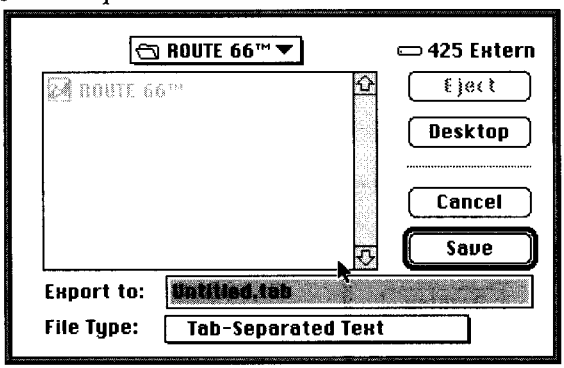


You use the dialog box above to indicate which file you want to import. If you select a text file, you must also indicate the sequence in which the fields are to be imported.



The field names can be moved in reference to the information in the left-hand section of the box, to indicate the import sequence for the various fields.

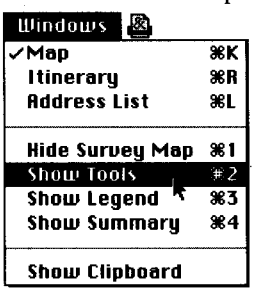
3.2.4.7 Export...



In ROUTE 66, you can export to three different types of text files: tab-separated, comma-separated and semicolon-separated files.

3.2.5 The Windows Menu

The Windows menu provides access to all windows and palettes of ROUTE 66.

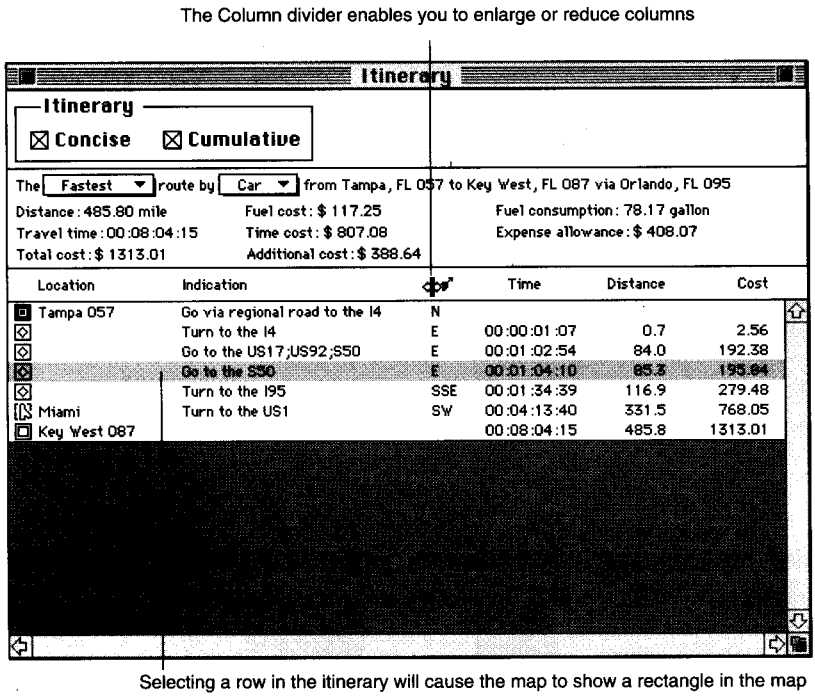


3.2.5.1 Show/Hide Map (⌘-K)

Use this command to open the window with the map or to move it to the foreground.

3.2.5.2 Show/Hide Itinerary (⌘-R)

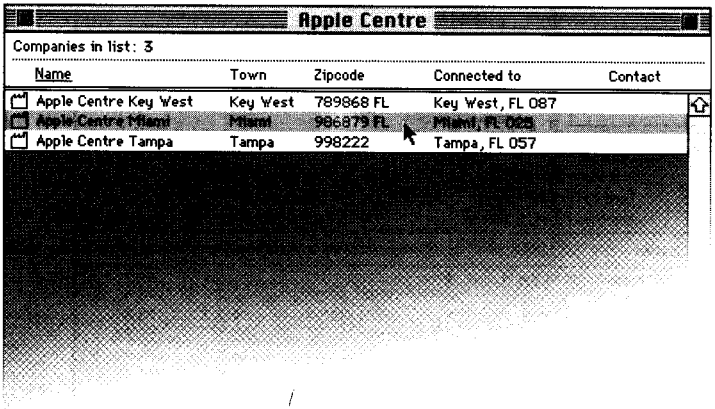
Use this command to open the window with the itinerary or to move it to the foreground.



When you use the cursor keys to move through the itinerary, the route being described is outlined on the map. This enables you to find the exact locations listed in the itinerary.

3.2.5.3 Show/Hide Locations List (⌘-L)

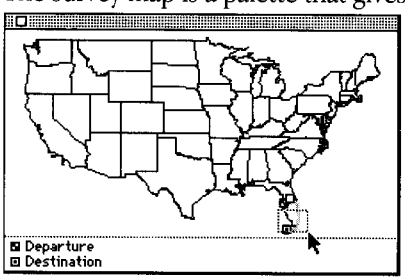
Use this command to open the window with the locations list or to move it to the foreground. As you move the cursor through the locations list, the location logos on the map are outlined, making it easy for you to find them.



By clicking the headings in the window, you can sort the list according to the fields included in it. The field on which the sorting is based is underlined.

3.2.5.4 Show/Hide Survey Map (⌘-1)

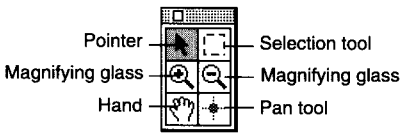
The survey map is a palette that gives an overview of the map that is being used.



You can zoom in on the map in this palette by dragging a rectangle with the pointer in the Tools palette. The map then zooms in on the section you have selected.

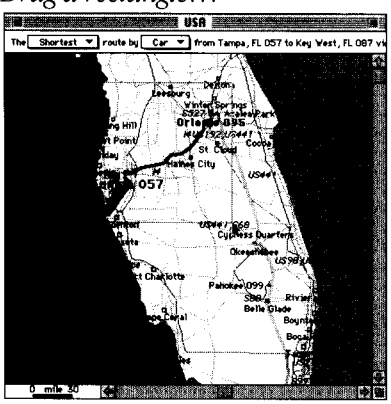
3.2.5.5 Show/Hide Tools (⌘-2)

You can use the tools in the Tools palette to make selections and to manipulate the map. The Tools palette can only be opened when a map is open.

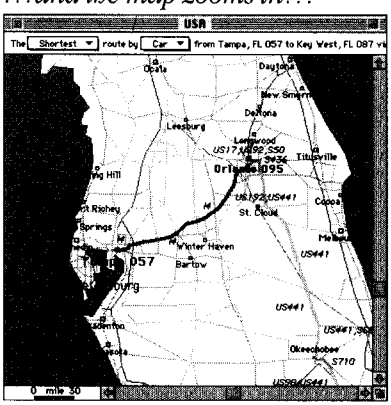


Pointer: You use the pointer to zoom in on a specific section of the map. This is done by dragging a rectangle with the pointer in the map or the survey map. The map then zooms in on the section you have selected

Drag a rectangle...

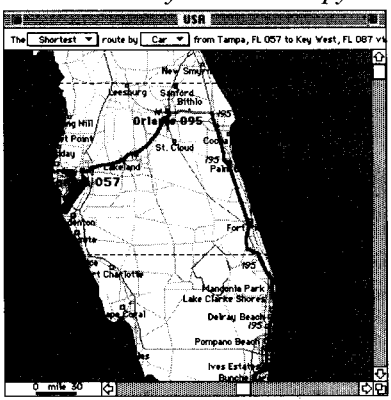


...and the map zooms in...



Selection tool: You use this tool to select a section of the map. You can then copy the selected section, and paste it into any Macintosh application.

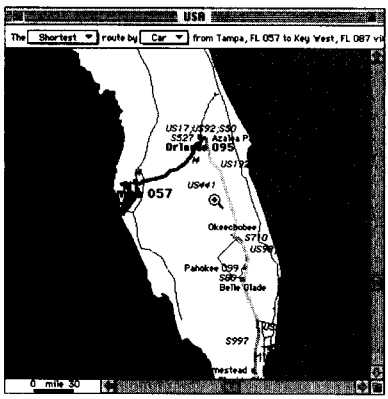
Select the area you wish to copy and choose Copy from the Edit menu...



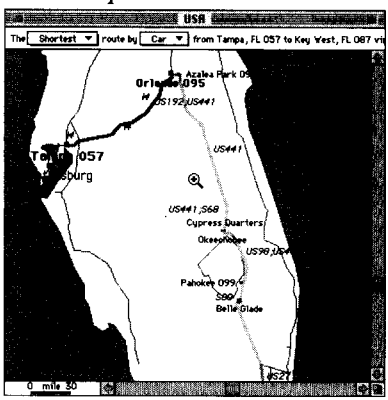
You can view the section you have copied on the clipboard. The clipboard can be opened by choosing Show Clipboard from the Windows menu.

Magnifying glass: You use this tool to zoom in and out on the map. The point you click on becomes the center point on the new map. The magnifying glass makes the scale twice as large or small, as indicated in the scale in the lower left of the window. You can also use the pointer to zoom in on a map.

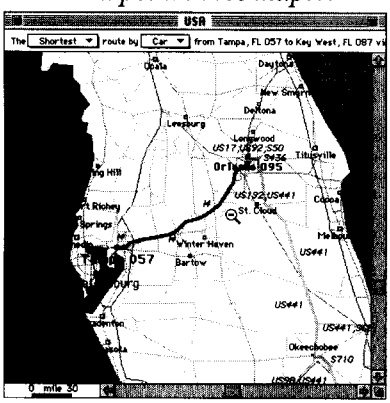
Click on a point in the map...



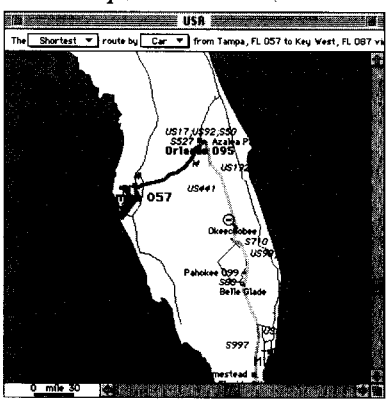
...the map zooms in...



Click on a point in the map...

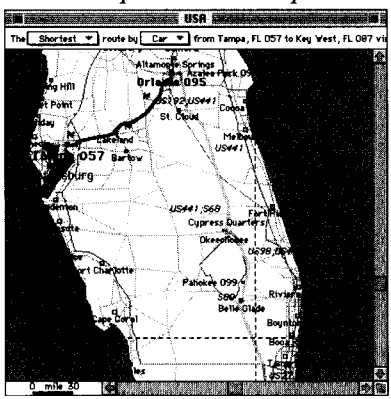


...the map zooms out...

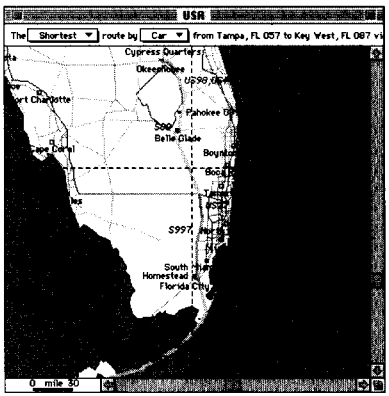


Pan tool: You use this tool to change the center point of the map while retaining the same scale. See the figures below for a description of how this tool works. This is a handy way to scroll outside of the window.

Click on a point in the map...

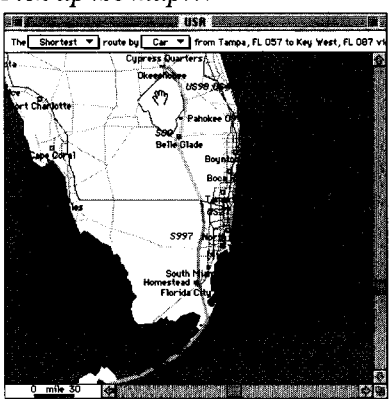


...this will be the new centre...

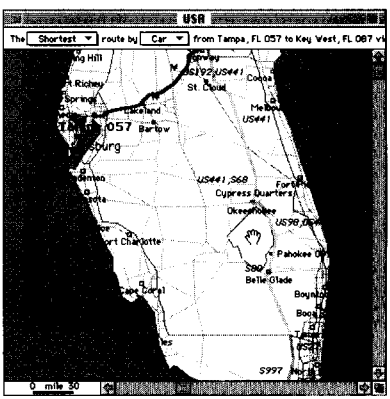


Hand: You use this tool to pick up and move the map in a reduced window. See the figures below for a description of how this works.

Pick up the map...



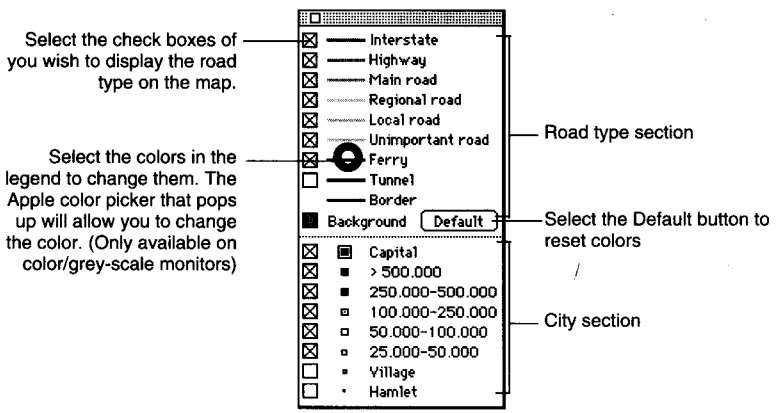
...and move it around...



❖ Note: You can only use the scroll bars if the window with the map is smaller than your screen. Scrolling outside of the section of the map that you have zoomed in on can only be done with the Pan tool. ❖

3.2.5.6 Show/Hide Legend (⌘-3)

The legend lists the various types of roads and locations. The checkboxes next to the types of roads and locations indicate which items are shown on the map. ROUTE 66 chooses which items will or will not show for each scale. You can call up additional information by clicking the checkboxes. ROUTE 66 will then fill in the desired information on the map.

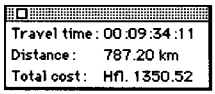


If you are using a color monitor, you can also change the colors of the roads and the background. This is done by clicking on the existing color in the legend and then clicking on the desired color in the color wheel that appears.

When a companies file has been opened, a checkbox is added to the bottom of the legend, which can be used to switch the logos in the map on and off.

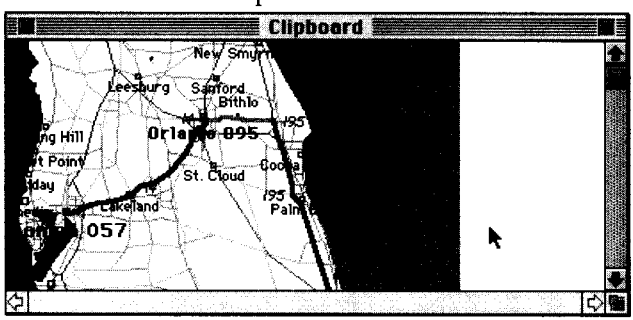
3.2.5.7 Show/Hide Summary (⌘-4)

The Summary palette shows the summary for the calculated route. For additional information about fuel costs, for example, you can open the itinerary.



3.2.5.8 Show/Hide Clipboard

Use this command to open a window that shows the contents of the clipboard.



3.2.6 The Help Menu

The help menu provides two forms of help: Balloon Help and ROUTE 66 Guide. The ROUTE 66 Guide works similar to the Macintosh Guide. See your Macintosh System Software manual from Apple for more information about using Apple Guide. For more information about Balloon Help we refer to 'Balloon Help' on page 6.

3.2.6.1 ROUTE 66 Guide (⌘-?)

The ROUTE 66 Guide provides lots of information on how to use the application. If you need assistance while using the application, consult the ROUTE 66 Guide first. For more information on how to use the Guide we refer to the Macintosh System Software manual.

4 Software License Agreement

IMPORTANT: READ THIS AGREEMENT BEFORE OPENING THE MEDIA PACKAGE. This is a legal agreement between you, the end user, and ROUTE 66 Geographic Information Systems B.V. (ROUTE 66). By breaking the seal and opening the media package you are consenting to the terms of this License. If you do not agree with the terms of this non-exclusive License Agreement, DO NOT OPEN THE MEDIA PACKAGE.For a full refund, return the unopened media package and all accompanying materials within seven (7) days to the place where you obtained them.

DEFINITIONS: As used in this License Agreement, "Software" means the computer programs contained in the media in this package, together with any additional programs, updates or revisions subsequently supplied by ROUTE 66. "Software Copies" means the actual copies of all or any portion of the Software, including backups, updates, merged or partial copies permitted hereunder or supplied by ROUTE 66 in the future. "Data" means the non-Software information contained on the media provided with this package which is used and manipulated by the Software. "Data Copies" means the actual copies of all or any portion of the Data, including backups, updates, merged or partial copies permitted hereunder or supplied by ROUTE 66 in the future. "Related Materials" means all of the printed materials and whatever is in this package, the non-Software and non-Data contained in the media which are supplied in this package or later supplied by ROUTE 66 for use with the Software. In order to preserve and protect its rights under applicable law, ROUTE 66 is not selling you the ownership rights to Software or Data (owned by or licensed to ROUTE 66). ROUTE 66 specifically retains title to all ROUTE 66 Software and Data, and ROUTE 66 licensors retain title to items owned by them.

USES PERMITTED: Software and Data may be used on a single terminal or a single workstation of a computer. Software and Data may be installed onto a hard disk drive. Up to three backup copies may be made, provided they are made only for backup purposes, and possession of the copies is retained by you. This License gives you certain limited rights to use and maintain the Software, Software Copies, Data, Data Copies and Related Materials. You do not become the owner of, and ROUTE 66 retains title to, all the Software, Software Copies, Data, Data Copies and Related Materials. In addition, you agree to use reasonable efforts to protect the Software and Data from unauthorized use, reproduction, distribution or publication. You may transfer them on a permanent basis if the person receiving agrees to the terms of this License and prior written consent is given by ROUTE 66. All rights not specifically granted in this License are reserved by ROUTE 66.

USES NOT PERMITTED: YOU MAY NOT (1) Make derivative works as defined by Dutch copyright law, or make copies of the Software or data, except as permitted above; (2) Make copies of the Related Materials; (3) Use the Software in a network or multiple user arrangement, unless you pay for and obtain a separate licensed Software package for each terminal or workstation from which the Software and Data will be actually accessed; (4) Rent, lease, sublicense, time-share or lend the Software, Software Copies, data, Data Copies, Related Materials or your rights under this License; (5) Alter, decompile, disassemble or reverse-engineer the Software, or make any attempt

to unlock or bypass any initialization system or encryption techniques utilized by the Software or Data; or (6) Alter, remove or obscure any proprietary legend, copyright or trademark notice contained in or on Software, Data or Related Materials.

DURATION: This License Agreement is effective from the day you open the sealed media package and continues until terminated. Termination is automatic, without notice from ROUTE 66, if you fail to comply with any provision of the License. Upon termination, you must destroy the written materials, the Software, Data and all Software and Data copies. ROUTE 66 can also enforce its other legal rights.

GENERAL: This Agreement represents our entire understanding and agreement regarding the Software, Software Copies, Data, Data Copies and Related Materials, and supersedes any prior purchase order, communication, advertising or representation, and may only be modified in a written amendment signed by an authorized ROUTE 66 officer. If any provision of this Agreement shall be unlawful, void or for any reason unenforceable, that provision shall be deemed severable from, and shall in no way affect the validity or enforceability of, the remaining provisions. This Agreement will be governed by the Laws of The Netherlands and shall benefit from ROUTE 66, its successors and assigns. You are consenting to jurisdiction in the courts located in The Netherlands.

5 Limited Warranty

COVERING THE PHYSICAL MEDIA AND PRINTED MATERIALS: ROUTE 66 warrants to you, the original licensee, that the media on which the Software is recorded are free from defects in materials and workmanship under normal use and service FOR A PERIOD OF NINETY (90) DAYS FROM THE DATE OF PURCHASE as evidenced by a copy of the receipt. ROUTE 66's entire liability and your exclusive remedy as to defective media or Related Material(s) shall be, at ROUTE 66's option, either return of the purchase price or replacement of the media or Related Material(s). Each defective item, along with proof of purchase and date, must be sent in a traceable manner, to: ROUTE 66 Geographic Information Systems B.V., Kerkewijk 69, 3901 EC Veenendaal, The Netherlands.

DISCLAIMER REGARDING THE SOFTWARE AND DATA: THE SOFTWARE AND DATA ARE PROVIDED 'AS IS'. ROUTE 66 DOES NOT WARRANT, GUARANTEE OR MAKE ANY REPRESENTATIONS REGARDING THE USE, OR RESULTS OF USE, OF THE SOFTWARE, DATA OR RELATED MATERIALS IN TERMS OF CORRECTNESS, ACCURACY, RELIABILITY, CURRENTNESS OR OTHERWISE. THE ENTIRE RISK AS TO PERFORMANCE AND RESULTS OF THE SOFTWARE IS ASSUMED BY YOU. NEITHER ROUTE 66 NOR ANYONE ELSE WHO HAS BEEN INVOLVED IN THE CREATION, PRODUCTION OR DELIVERY OF THIS PRODUCT SHALL BE LIABLE FOR ANY DIRECT, INDIRECT, CONSEQUENTIAL OR INCIDENTAL DAMAGES (INCLUDING DAMAGES FOR LOSS OF BUSINESS PROFITS, BUSINESS INTERRUPTION, LOSS OF BUSINESS INFORMATION AND THE LIKE) ARISING OUT OF THE USE, MISUSE, OR INABILITY TO USE THE LICENSED SOFTWARE AND DATA EVEN IF ROUTE 66 HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. IF THE DISCLAIMER OF WARRANTY OR LIMITATION OF LIABILITY SET FORTH IN THIS AGREEMENT SHALL FOR ANY REASON WHATSOEVER BE HELD UNENFORCEABLE OR INAPPLICABLE, YOU AGREE THAT ROUTE 66'S LIABILITY SHALL NOT EXCEED THE LICENSE FEES PAID BY YOU WITH RESPECT TO THE SOFTWARE AND DATA UNIT(S) AT ISSUE.

ACKNOWLEDGEMENT: You acknowledge that you have read this LIMITED WARRANTY, understand it, and agree to be bound by its terms and conditions. You also agree that: (1) No oral or written information or advice given by ROUTE 66, its dealers, distributors, agents or employees shall in any way increase the scope of this warranty, and you may not rely on any such information or advice. (2) This Limited Warranty is the complete and exclusive statement of agreement and supersedes all proposals or prior agreements, oral or written, and any other communications you may have had prior to purchasing.

Apple Computer, Inc. and ROUTE 66 G.I.S. B.V.
remind you to help prevent software piracy and the unauthorized duplication of software. For more information on how you can help, contact ROUTE 66 at 31 – (0)8385 + 54724.

This manual was written and edited on Macintosh computers, using FrameMaker, Adobe Photoshop, Capture 3.0, and Adobe Illustrator. Proof pages were printed on an Apple LaserWriter. Final pages were output to film on a Linotronic imagesetter.
